114 121 treatment. In the absence of sufficient analytic material on the intervening years since his book was written, a prefatory note such as this can do little more than comment on Haitian society, either in terms of its present design or in terms of the recent events that may have modified it.

121 114 565 [178] The central thesis of Leyburn's book is that Haitian society is sharply divided into two segments, and that the national institutional structure is such that no significant alteration in that division has occurred in the entire course of Haiti's history as a sovereign nation. At the base of the society is the rural agricultural sector, making up perhaps as much as 95 per cent of the population; at the top the elite, which dominates the governmental apparatus and all national institutions. These two segments of the society differ, in Leyburn's view, in all important regards: level of income, source of income, education, language, religion, social forms, values and attitudes, and all else. By carefully describing the history of Haitian society from the eve of the revolution until the midst of the United States occupation, he reveals both the origin of this vast social cleavage and the various means employed for its perpetuation. Leyburn was so impressed by the gap which separated yeomanry and elite that he chose to label these social segments castes rather than classes. Members of the elite earn their livings as rentiers, merchants, professionals, and in government, and never engage in manual labor of any sort. They are predominantly urban in residence; their sons attend private lower schools, and then [191] [197] [58] [59] [829] go on to higher education, usually abroad. They are French-speaking, although they also speak Creole, Haiti's national language. Elite religion is Catholicism, elite forms of marriage and domestic organization are "legitimate" and "western." Elite members view themselves as a kind of aristocracy, and feel little commonality in their sharing of Haiti and of Haitian history with the yeomen.

114 565 191 771 583 595 144 In sharp contrast, the yeomanry is rural, poor, works the land, is illiterate and Creole-speaking only, believes in *vodoun* rather than in orthodox Catholicism, usually marries by common law and is sometimes polygynous, and remains substantially isolated from the outer world. Finally and importantly—though its particular significance is changing—the elite differs from the rural sector in that the countryman is predominantly negroid in phenotype, while members of the elite are prevailingly lighter-skinned.

The financing of these many revolutions was usually provided by foreign merchants, bent upon installing a government that would grant them special economic concessions (Munro, 1964:326–31). The United States occupation ended this doleful succession of regimes and, by throwing its weight to the elite, by suppressing military activity in the countryside, and by reforming the army, the United States gave a new meaning to the separation of the elite and the yeomanry. Leyburn's interpretation is consistent with these events; yet some Haitian scholars have differed with Leyburn's analysis.

In a lengthy review article, the dean of Haitian historians, Dr. Jean Price-Mars (1942:1–50), questions the applicability of the term "caste" to the social groupings of Haitian society. He notes that Haitian law after the revolution never legitimized any distinction on grounds of physical type, unlike a society such as the United States—that in fact, the very basis of Haitian polity was the absence of such distinctions. Furthermore, Leyburn's interpretation is qualified by the fact that the elite and the rural masses are not entirely distinctive physically. In some parts of rural Haiti, particularly in the southern peninsula, there are many light-skinned people; and many individuals who qualify as members of the elite on all other counts are very dark in appearance. The fact that being "Negro" or "white" in Haiti is viewed as a matter of degree, rather than of kind, complicated by all the other criteria of social position employed in drawing distinctions, has important implications for the way social barriers have operated in that country.*

Leyburn did not contend that all the effects of the United States occupation were in the direction of increasing the gap between the ELITE AND THE YEOMANRY.

* In this regard, Haiti is aligned with most of Latin America, in contradistinction to the United States, where many persons believe that "one drop of Negro blood" [sic] makes a "Negro." The failure of North Americans to distinguish between sociological and genetic categories of physical type has led to considerable confusion in their dealings with Latin America and in their understanding of Latin American societies. North American race prejudice at its most extreme sees color as the primary basis for social ranking, and no individual accomplishment (for instance, in terms of economic or intellectual success) can overshadow the inferior status unalterably bestowed by certain physical traits. Haitians—and generally all Latin Americans—social distinctions do not rest solely on considerations of physical type; a black skin does not "doom" an individual if his attainments make him otherwise the equal of his lighter-skinned fellow citizens. Hence, it might be argued that the term "caste" would be more appropriate when applied to the Negro people of the United States (regardless of phenotype, and including those "Negroes" who are *sociologically* identified with the Negro people even if their physical appearance is dramatically Caucasian) than when applied to the peoples of Latin America.

elite and the yeomanry. For instance, he calls attention to one unanticipated (but inevitable) result of the occupation in this connection: the large number of children whose fathers were United States Marines, and whose mothers were members of the Haitian rural masses. In this way the occupation contributed to the growth of the physically intermediate population of Haiti, especially among rural folk, and thus perhaps to some bridging of the gap between yeomen and elite. Much more important, by its contributions to a broadening of the educational system, the occupation enabled talented black-skinned youths to improve themselves and to acquire new aspirations.

Recent economic and political developments in Haiti, through the period 1941–57, have contributed grounds for modification of the Leyburn interpretation. Though Leyburn predicted that "for the present and near future it is safe to say that there will be no more black non-élite presidents" (p. 101), subsequent developments soon proved him wrong. In January 1946, the government of elite member Élie Lescot fell under military pressure. A junta consisting of Franck Lavaud, Antoine Levelt, and Paul Magloire facilitated the installation of Dumarsais Estimé as president. Estimé was a dark-skinned man from the countryside (the village of Verettes, near St. Marc, in west-central Haiti), who had received a good education, served as a minister in the Vincent cabinet and, as a deputy, married a lighter-skinned woman whose family's elite membership was secure. Estimé might well be considered a self-made member of the elite, but he was not born into it, and his accession to power was the political expression of new possibilities in Haitian life.

The changes Estimé's regime symbolized were rooted in the intellectual resistance to the United States occupation and in the search for a Haitian identity in the face of that occupation. The strangely easy domination that the United States wielded over Haitian society for several decades, and the relatively unexploitative but patronizing administration it provided, ended forever a fantasy that had gripped Haitian intellectuals for more than a century. The world of 1804, when a bloodied but defiant Haiti could bar by force of arms Napoleon's dreams of a New World empire (and assist indirectly thereby in the territorial expansion of a still weak United States) had vanished. The time when a Pétion could aid, protect, and politically influence a sick and tired Simón Bolívar was long gone. The world had changed, while Haiti, the Haitians learned under their North

I

THE PEOPLE AND THEIR COUNTRY

IN the ten thousand square miles of Haiti's mountains and valleys more than two and a half million people—some say more than three million—are crowded together. Some are black, some light-skinned, but less than five thousand are white, and these are almost all recent immigrants to the country. Modern Haiti has its racial roots primarily in Africa, but its social roots lie as much in Europe as in Africa; if it is "American" at all, geography and a few fairly superficial characteristics are the only American qualities it displays.

Carrying our own cultural interpretations with us when we visit our Caribbean neighbor, we are likely to misunderstand what we see in Haiti, for it is very easy to think of all colored people in terms of our own. To do so is to remain completely ignorant of Haiti. Whereas in the United States we use "Negro" and "colored" indiscriminately as synonyms, making a real distinction only between "black" and "mulatto," all four terms are taboo in polite society in Haiti. A new descriptive vocabulary, an entirely new frame of reference, must be acquired by the friendly foreign visitor to this West Indian republic.[1]

Probably the most striking phenomenon in the country is its division into two social groups. So rigidly are the class lines set that

1. No greater error of tact can be made by visitors to Haiti than to use such commonly accepted American terms as Negro, colored, mulatto, blacks, Africans. Whereas in the United States such words are employed to describe people with a greater or less degree of Negro blood, in Haiti they are generally regarded as opprobrious epithets, emphasizing the color of the epidermis as all important, while ignoring the essential matters of culture, standard of living, and social background. Not many Haitians would have the grace to reply, as President Pétion suggested to a subaltern who was incensed at a white man for calling him "un nègre," "Why, then, did you not call him 'un blanc'?" Probably the most offensive of all the terms is *mulâtre*, for it calls attention to miscegenation in the family. The educated people in general regard themselves as darker Frenchmen, not as transplanted Africans. Books about Haiti which refer to the "black republic" seem to them to ignore the important fact that the blacks, though numerically preponderant, do not rule. The visitor must accordingly acquire a new vocabulary of color. It is safer not to make any allusion at all to the matter; but if occasion demands, one speaks of "jaune" and "brun," not white and black.

several generations of ancestors, there can be little question of its high social position.

Religion affords still another distinction between high and low. Haiti has a folk religion which American tourists call Voodoo (a name which makes them think immediately of superstitious emotionalism or some kind of occult balderdash), but which is more properly called Vodun. It is a true religion in that it answers for the native the questions arising in the world he knows, while giving him confidence to face the crises of life. Vodun is African in origin, Créole in its language, and homely in its creed and practice; none of these makes it any less a religion. The official religion of the country, on the other hand, is Roman Catholicism. Few members of the élite, however their hearts may yearn for the consoling securities of Vodun, dare openly either to acknowledge their "atavism" or to participate in the cult. They must be Catholics or agnostics. It is often remarked that below the surface many a professing Catholic aristocrat cherishes Vodun beliefs; the important fact is that he keeps his folk worship secret. Because the outside world ridicules Vodun as superstition, and because the approved Catholic Church fights it, government restrictions effectively keep its ritual out of the public gaze. All the discriminatory laws, however, have not weakened its hold upon the masses. It is because Vodun is a *folk* religion that the élite cannot permit themselves to adhere to it openly.

The final and most complicated distinction between the two castes is skin color. Any generalization on this matter is open to numerous exceptions; moreover, the whole question of color in Haiti touches the most sensitive nerves of the upper classes. One must begin by such casual observations as these: the vast majority of the lower orders are definitely dark or even black; the lighter the skin, the more likely a person is to belong to the élite. It is true that there are black aristocrats, and it is equally true that numbers of peasants have light complexions. At almost any function in high society, however, the proportion of dark-skinned persons is decidedly small. Among the youth, the tendency is always to select a spouse whose skin color is light; marriages are often made between aristocrats and white foreigners resident in Haiti, so that the children may lighten the family complexion. While it is therefore inaccurate to assert that no full-blooded Negroes belong to the élite, it is also clear that lighter persons tend to have social advantages.

175 The Occupation had had other far-reaching consequences. It had
648 removed from the Constitution an article which had endured from
642 the very first—the prohibition against ownership of land by white
423 people. Americans argued that since Haiti's greatest potential source
563 of wealth was agricultural (sugar and coffee in particular), new methods were needed if rehabilitation were to occur. Only foreign whites had both the necessary wealth and the requisite agricultural knowledge: therefore, whites must be attracted into the country by an opportunity to establish plantations. Although the Senate of Haiti protested violently against this reversal of tradition, which struck at the people's long pride in their complete ownership of the land, the Americans yielded only on the point of requiring five years' residence of the white landlord in the country. The influx of foreign whites has not been large, but in the Plaine du Nord and Port-au-Prince the white "colonies" are considerably larger now than in 1914.

175 Up to the present moment the white element in Haiti has not
648 exerted any noticeable pressure on the government. Its mere pres-
563 ence, however, is bound to be a restraining influence on politicians, for most of the whites are Americans, and the government at Washington may not always follow a good-neighbor policy. With the clannishness so usual in white colonists living among darker people, the Americans in Haiti have their private clubs and their closed social set. For the first time since 1804 the élite are socially not the highest-ranking persons in the country.

175 The physical presence of several hundred white Marines for nine-
648 teen years had also one unplanned but inevitable result: an increase in
563 the amount of white blood in the population. For many decades
144 numerous élite had rested comfortably beneath their light skins, knowing that only they, with their greater mobility in the world, had any real chance to sustain a white strain. The Occupation, however, brought white men in contact with black women; there was a steady average of 2,000 white Marines in the country for two
[554] decades. The light skin of resulting offspring suggested to many the possibility of a climb up the social ladder now that the most difficult rung had already been achieved. No figures are available on the number of children born in Haiti between 1915 and 1934 of white fathers, but it was a perceptible influx in the lower class.

175 Haitian businessmen enjoyed a greater economic prosperity during
458 the Occupation than they had ever known before. It is commonly
